

## ***Section X. Plan Evaluation, Adaptation, and Amendment***

This watershed management plan is not intended to be a static document. It will be reviewed on an annual basis to:

- Review and Update Concerns, Sources, and Critical Areas
- Create Annual Work Plans
- Target potential funding sources
- Document Progress

The review and adaptation process may be scheduled to coincide with grant funding cycles, planning processes of major community organizations, and planning processes for local government agencies.

This plan may be adapted or blended with other watershed management plans to effect larger-scale change and capitalize on shared resources.

The ultimate goal of this watershed management plan is to promote improved environmental stewardship and the long-term sustainability of the Busseron Creek Watershed Partnership.
